Equalized Total Tax Rates (Col.1) are calculated using the Equalized Valuation and the amount raised by local taxation for school, municipal and county purposes from the 2002 Abstract of Ratables.

Ratio: Eq Tot Tax Rate vs. State Avg (Col. 2) is calculated by dividing each municipality's total equalized tax rate by the state average tax rate.

The State Rank (Col.3) represents the 566 municipalities sorted highest to lowest according to the ratio of Equalized Total Tax Rate to the state average total tax rate.

Col. 4 indicates the municipalities in which schools are operating under the New Jersey Supreme Court's 'Abbott' decision
